

Indiana's Telephone Privacy law has greatly improved our home life. I am married with 2 kids and no longer spend all day (especially during dinner and bed times) answering unsolicited phone calls. I used to receive 7-10 telemarketing calls a day and now only get 1-2 per week from charities. Please do not change this law that has greatly improved peoples' home lives. Sign up is voluntary, so I would think that by the thousands of homes that are on the list the supporting numbers should speak for themselves. Please Please Please do not bring unwanted and unsolicited telemarketing calls back into my home. Thank You!
